

# Nuova Euromec - Creativity and Flexibility

Specializing in batch or continuous rolling, laminating, extrusion, sizing, forming, cooling, selecting and grading, end-line automation, laboratory and test equipment.

Interpack 2017 is fast approaching and we are very enthusiastic about the equipment we are planning to display at our booth in Düsseldorf. It's our pleasure to invite you to discover our newest equipment for the confectionery & pharmaceutical industry. Here are some of our innovations:

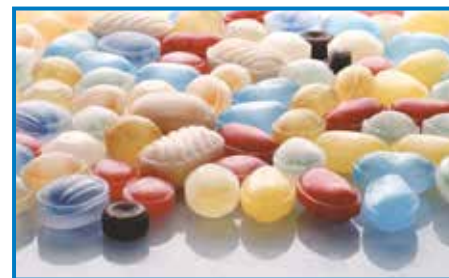

## S3 I 3D SOFT

Shape flexibility thanks to an innovative chain forming concept: traditional and innovative 3D products, filled candy cup shape presentation available on the same line.

Also shown at Chocotech stand in Hall 3 Booth 3A07

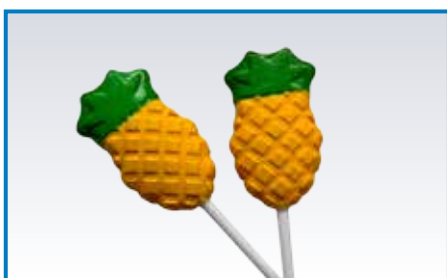

## ROTARY PHARMA LAB

Lines suitable for both R&D laboratory and high speed industrial capacity keeping same quality concept and design.

Nuova Euromec provides IQ, OQ & PQ documentation. Small scale equipment specifically manufactured for lollipops, chewy candy, caramel and gum.

## S40 CHEWY 3D FILLED LOLLIPOP

A new system designed to wrap flat or three dimensional lollipops.

Possibility of continuous automated process from forming to wrapping and from wrapping to cooling.

## FLEXY LOLLIPOP S38 / APOLLO

Forming machine for the production of ball and cylindrical shaped products with flexibility for syrup/jam filled lolly, four-colour lolly in automatic process.

Option to produce on the same system hard and filled candy. Among the product possibilities also spherical, cylindrical or three dimensional lollipops with regular solid pieces such as a whole nut or almond inclusion.
