

Confectionery Pavilion Returns with Innovative Processing and Packaging Solutions

ProPak Asia 2018 hosts leaders in the confectionery processing, packaging and supply industries at Asia's largest industry event

The Confectionery Pavilion will return to **ProPak Asia 2018** during **13-16 June at BITEC, Bangkok** offering ideas and solutions to confectionery manufacturers across every industry; including candy, gum, chocolate, snacks, jelly, toffee, and sugar confectionery. This trade show is ideal for anyone involved in the production process from basic production through to packaging.

At this year's Confectionery Pavilion, visitors will meet the top specialists in the confectionery process and packaging supply sector who will showcase innovative solutions, including weighing and dissolving systems from Chocotech, confectionery extruders from Euromec, hard candy cooking & forming lines from Hänsel Processing, enrobing machines from Sollich, Mogul equipment from Winkler und Dünnebier Süßwarenmaschinen GmbH, and intelligent packaging machines from Theegarten-Pactec.

Apart from those six specialists, there will also be over 30 top confectionery suppliers at the exhibition showcasing and answering questions about the latest processing and packaging machinery and equipment, for example, Bühler - innovative solution provider for chocolate production, A.M.P Rose - one of the world's leading machine builders for the confectionery and chocolate industries.

One key factor for confectionery market growth is product variety. Manufacturers must look for solutions, including new product development, pack sizes and affordability through advanced systems and technologies to meet upcoming challenges, which you can find the best solution and technology at **ProPak Asia 2018**
