## Innovative system solutions for your business success.

03

Your high quality and versatile products deserve perfect, efficient and sustainable packaging. Hastamat can make it happen with their range of innovative system solutions – as well as provide everything from one source. We also offer a unique service organisation through our after sales support, worldwide!

As part of the Piepenbrock Group – an owner-operated, fourth-generation family business – our goal is to make your business more successful. We see our customers as true partners, with whom we have lively exchanges while aligning ourselves to their specific needs. This is how new packaging ideas, experiences and suggestions are incorporated into the process of innovation, making the good even

better. Together, we can develop customised packaging solutions and packaging lines.

We look forward to welcoming you to our stand at Anuga Foodtec 2018 in Cologne (hall 9.1, stand A41), where we can greet you personally and engage in interesting discussions.

# High Performance Packaging – Complete Turnkey Lines.

> **HASTAMAT designs and manufactures individual high performance packaging machines and complete lines.**

In addition to the quality of our machinery and our innovative creativity, being part of the Piepenbrock Group means we are close to the customer worldwide and can ensure the highest level of investment security.

Our customer's benefit from one-stop shopping – ranging from made-to-measure project design through dependable installation right down to comprehensive customer service.

This reflects our performance promise: Packaging your ideas!

Flexible packaging lines for highest outputs as well as customised engineering for special packages. The ideal machines for packaging of fresh and frozen food, of course in hygienic design. Complete systems for feeding, weighing and packaging of stick-shaped products. Individual packaging lines for stackable chips – the perfect choice for gentle gravimetric dosing and filling into cans, with or without trays. Special solutions for fragile products such as salted or biscuitsticks, chocolate, tea or coffee sticks in the field primary and secondary packaging.

## Product range:

- > Complete packaging lines with individual dosing and weighing systems
- > Product handling and distribution systems
- > Sorting and packaging lines for stick-shaped products
- > Multihead weighers
- > Vertical form fill and seal machines
- > Counting lines
- > Packaging lines for stackable chips

## Branches:

- > Food
- > Snacks
- > Confectionery
- > Frozen food
- > Chemicals
- > Non-food

# Hygienically dosed, packaged with care.

Where speed meets perfect handling.

At the Anuga FoodTec, Hastamat is presenting its multihead weigher CP-HD in hygienic design.

The hygienic design is particularly suitable for precise dosing of cheese, meat as well as fresh and deep-frozen food products. The frameless structure is designed specifically for wet cleaning. Specially-adapted transfer systems allow flexible combination with thermoform or tray sealing machines. Thanks to the clear design logic, format change at the servo-controlled transfer system is performed quickly without the need for tools.

The software is integrated in the weigher control and specifically adapted to the requirements of the food industry.

With the RM-270, Hastamat presents its continuous, vertical form fill and seal machine for the high performance applications. With the compact overall height of the unit, we combine high speed with maximum product care. With modular stainless steel construction, the machines in hygienic design are optionally available with water and dust protection. Structurally, the drive elements are clearly se-

parated from the product, thus facilitating machine maintenance and cleaning. With an output of up to 220 bags per minute, the RM-270 effectively covers all formats and bag shapes. Different types of feeding systems and special applications can be flexibly integrated. At the Anuga FoodTec trade fair Hastamat exhibits the machine in combination with a product transfer system that forms the interface with the further machinery in the packaging process.

# Perfect service for your packaging machines.

08

**Our competent and flexible service team responds promptly and around the clock to your needs. Support covers technical queries, analyses, technician visits and spare part logistics – of course in the shortest possible turnaround time.**

The sophisticated technology from Hastamat is known around the world for its quality and reliability. Customers particularly appreciate the excellent efficiency and machine uptime.

In order to better support our customers in their market environments, Hastamat have built a strong service organisation in after sales service. And not just in Europe, with an emphasis on Germany, Austria and Switzerland, but also in North and South America and with offices in Russia and Ukraine, the Middle East and throughout Asia. The difference between excellent engineering and a perfect solution is a global service network.

„You can count on our top service - worldwide!“

Anette Drescher, Director After Sales

## Corporate Consciousness is Not an Option. It's a Must.

**A good solution becomes great if it has a sustainable effect.**

Packaging machines and systems from the Piepenbrock Group are providing long-lasting – and therefore sustainable – packaging solutions for decades thanks to excellent precision and maximum reliability. But we don't stop there: We went even further by establishing our “Carbon Neutral

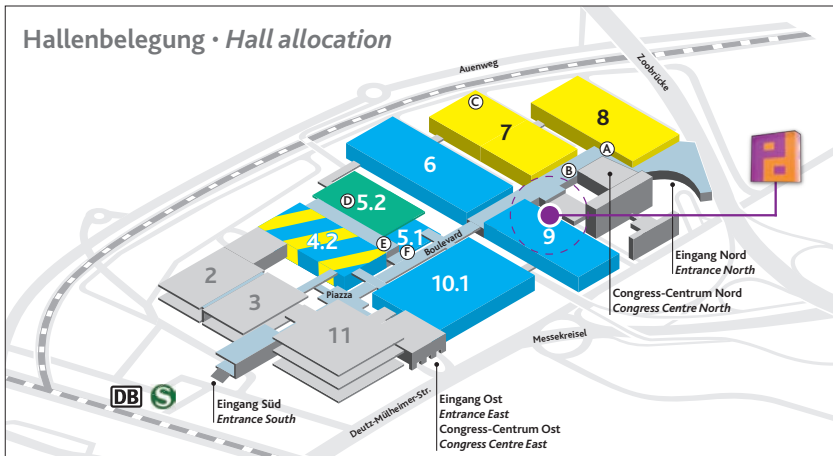

Packaging” programme. Through this initiative, we completely offset the CO<sub>2</sub> emissions generated during the value creation of our machines by supporting climate protection projects around the world. In addition, we plant a tree in our own forests for every tonne of CO<sub>2</sub> produced by our machines in their first year of operation.

These trees represent more than ecological value; they also symbolise a long-term partnership with our customers.
